

# Krystal Klear® Fe 4% Iron

Patented Chelated Micronutrients

## GUARANTEED ANALYSIS

Iron (Fe) . . . . . 4%  
 4% Chelated Iron (Fe)  
 Derived from iron IDS and iron EDTA.

### General Information

Krystal Klear Iron IS FORMULATED TO BE USED IN FERTILIZER SOLUTIONS. Broadcast, band or row applications are acceptable, although greater efficiency may be expected from band applications. Micronutrient deficiencies usually occur when plants are small: therefore, micronutrient should be added to the fertilizer at / or before planting.

This product is recommended as a supplement to a well-balanced fertilizer program only.

### CAUTION: KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Avoid breathing spray mist. May cause irritation of nose, throat, or skin. Avoid contact with eyes, skin, and clothing.

### Mixing Instructions

**Tank Mixes:** Do not mix with pesticides or other chemicals without a compatibility test. An adequate test for compatibility involves mixing in a small container the proper proportions of the product with water and the other ingredients. Agitate and let stand for one hour. If a precipitate forms then apply the products separately.

Krystal Klear Iron will disperse in water with little or no agitation. Many pesticides can be applied with Krystal Klear Iron. Follow this mixing sequence: Water, Krystal Klear Iron and pesticide.

**Tank Buffering:** Water with a pH greater than 6 may diminish pesticide efficacy by way of alkaline hydrolysis. Nutrol™, a registered buffer, may be used to lower and maintain the pH of a spray tank and improve application efficacy.

### Storage Instructions

Krystal Klear Iron is a chelate with low corrosivity. It is recommended that Krystal Klear Iron be stored in fiberglass, polyethylene, or polyolefin. Do not stack pallets.

**CONDITIONS OF SALE:** Seller warrants this product consists of the ingredients specified and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions and use. No one other than an officer of the seller is authorized to make any warranty, guarantee or direction concerning this product. Because time, place, rate of application and other conditions of use are beyond the seller's control, the seller's liability from handling, storage, and use of this product is limited to replacement of the product or a refund of the purchase price.

This product is manufactured and distributed by:

LidoChem, Inc. • 20 Village Court • Hazlet, NJ 07730 • 732-888-8000

## Application Instructions

### Foliar Spray Application:

When foliar spraying Krystal Klear Iron through a conventional sprayer, use a minimum of 20 gallons of water per acre, per quart of Krystal Klear Iron.

When foliar spraying Krystal Klear Iron in low volume equipment, a maximum of 1 quart per acre is recommended. In low volume sprays with little water, burning may occur.

For best results, spray when the crop is in an active growing stage after irrigation or rainfall. Spray early mornings or late afternoons.

**VEGETABLES:** Apply 1/2 to 1 quart per acre each spray. Krystal Klear Iron can be incorporated into the normal spray program.

**FIELD CROPS:** Apply 1 quart per acre when plants are young. This is the time when the most severe deficiencies occur.

**TREE and VINE CROPS:** Apply 1 quart per 125 gallons of spray mixture. If concentrated spray is used, increase the concentration in direct proportion to the dilution. The above amount can be split into several applications. Split applications are more beneficial than a single application.

**TURF APPLICATION:** Apply 3/4 to 2 ounces per 1,000 sq. ft. each spray. Krystal Klear Iron can be incorporated into the normal spray program. Start applications in early spring, and repeat every 14-21 days.

### Aerial Application:

Consult your local agronomist for aerial application rates and dilutions.

### Soil Application:

Krystal Klear Iron is recommended for use on all types of soils. Dilute before use to ensure uniform coverage. The product can be incorporated into liquid fertilizers or applied separately. Soil applications may be made by drip, sprinkler or band application. If you do not have a soil or leaf analysis then apply the following rates:

**Maintenance Application** - 1 quart per acre.

**Moderate Deficiency** - 2 to 3 quarts per acre.

**Heavy Micronutrient Deficiency** - 4 quarts per acre.

If you have a soil or leaf analysis recommendation apply Krystal Klear Iron at the following rates:

Elemental Iron required by soil or leaf test (lbs./acre)	Quarts of Krystal Klear Iron	Pounds of Krystal Klear Iron
1	0.72	2
2	1.44	4
3	2.16	6
4	2.88	8
5	3.60	10
