

# Krystal Klear® Turf Mix

Patented Chelated Micronutrients

## GUARANTEED ANALYSIS

Boron (B) . . . . .	0.25%
Copper (Cu) . . . . .	0.25%
0.25% Chelated Copper (Cu)	
Iron (Fe) . . . . .	3.0%
3.0% Chelated Iron (Fe)	
Manganese (Mn) . . . . .	1.0%
1% Chelated Manganese (Mn)	
Zinc (Zn) . . . . .	0.25%
0.25% Chelated Zinc (Zn)	
Derived from copper EDTA, copper IDS, iron EDTA, iron IDS, manganese EDTA, manganese IDS, zinc EDTA, zinc IDS and boric acid.	

## General Information

Krystal Klear Turf Mix IS FORMULATED TO BE USED IN FERTILIZER SOLUTIONS.

This product is recommended as a supplement to a well balanced fertilizer program only.

## CAUTION: KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Avoid breathing spray mist. May cause irritation of nose, throat, or skin. Avoid contact with eyes, skin, and clothing.

**WARNING:** Some crops may be injured by the application of boron. Contact your county agent or field representative before making application.

## Storage Instructions

Krystal Klear Turf Mix is a chelate with low corrosivity. It is recommended that Krystal Klear Turf Mix be stored in fiberglass, polyethylene, or polyolefin. Do not stack pallets.

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.htm> or by writing to LidoChem, Inc. at the address on this label and referring to the lot/batch # on this container.

This product is manufactured and distributed by:

LidoChem, Inc. • 20 Village Court • Hazlet, NJ 07730 • 732-888-8000

Krystal Klear, Performance Nutrition and Nutrol are registered trademarks of LidoChem, Inc.

## Application Instructions

### Foliar Spray Application:

Application Rates:

<b>Maintenance Application:</b>	Apply 3/4 - 2 oz/1,000 sq. ft. every 2 weeks
<b>Moderate Deficiency:</b>	Apply 2-3 oz/1,000 sq. ft. every 2 weeks
<b>Severe Deficiency:</b>	Apply 4 oz/1,000 sq. ft. every 2 weeks

When foliar spraying Krystal Klear Turf Mix through a conventional sprayer, use a minimum of 20 gallons of water per acre, per quart of Krystal Klear Turf Mix.

When foliar spraying Krystal Klear Turf Mix in low volume equipment, a maximum of 1 quart per acre is recommended. In low volume sprays with little water, burning may occur.

For best results, spray when the turf is in an active growing stage after irrigation or rainfall. Spray early mornings or late afternoons.

## Mixing Instructions

**Tank Mixes:** Do not mix with pesticides or other chemicals without a compatibility test. An adequate test for compatibility involves mixing in a small container the proper proportions of the product with water and the other ingredients. Agitate and let stand for one hour. If a precipitate forms then apply the products separately.

Krystal Klear Turf Mix will disperse in water with little or no agitation. Many pesticides can be applied with Krystal Klear Turf Mix. Follow this mixing sequence: Water, Krystal Klear Turf Mix and pesticide.

**Tank Buffering:** Water with a pH greater than 6 may diminish pesticide efficacy by way of alkaline hydrolysis. Nutrol™, a registered buffer, may be used to lower and maintain the pH of a spray tank and improve application efficacy.

**CONDITIONS OF SALE:** Seller warrants this product consists of the ingredients specified and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions and use. No one other than an officer of the seller is authorized to make any warranty, guarantee or direction concerning this product. Because time, place, rate of application and other conditions of use are beyond the seller's control, the seller's liability from handling, storage, and use of this product is limited to replacement of the product or a refund of the purchase price.
