

PATENTED CHELATED MICRONUTRIENT SOLUTIONS

TURF AND ORNAMENTAL USE

- Krystal Klear® is the only micronutrient formulated with patented Baypure™.
- Baypure™, from Lanxess Chemicals, is an effective and efficient chelating agent that biodegrades within 48 hours...unlike others that persist in the soil.
- Krystal Klear is stable in solutions and soil in a wide range of pH.
- Krystal Klear is orthophosphate and polyphosphate compatible, and offer exceptional tank-mix compatibility with other fertilizers and pesticides.
- Krystal Klear is ideal for foliar, soil and drip irrigation applications.
- Krystal Klear minerals are more available than other chelated metals so they provide quick deficiency corrections.
- Krystal Klear has a low affinity for calcium so it won't induce calcium deficiencies.

Trees, Turf and Ornamental Products
