PREMIUM 9-0-9 SUSPENSION FERTILIZER WITH 9% CALCIUM

AGRICULTURE USE

The Product

- Prudent® Tri 9 is the latest addition to the Prudent family of products.
- Prudent Tri 9 was developed to provide balanced NK nutrition as well as deliver a powerful dose of Calcium.
- Calcium helps build strong cell walls and is a critical component of plant health.
- Prudent Tri 9 is a concentrated pour-able suspension that requires no special equipment to apply.
- As with all Prudent products, Prudent Tri 9 derives its nutrients from premium raw materials that are readily absorbed by the plant.
- Prudent Tri 9 and Nutrol™ Fungicide applied together or in alternation have been shown to minimize or eradicate a broad spectrum of soil-borne and foliar crop diseases*.

Guaranteed Analysis

Total Nitrogen (N)	9%
0.45% Ammoniacal Nitrogen	
7.75% Nitrate Nitrogen	
0.8% Urea Nitrogen	
Soluble Potash (K ₂ O)	9%
Calcium (Ca)	9%

Derived from: Calcium nitrate, calcium ammonium nitrate, potassium nitrate, and urea.

Suggested Use Rates (All crops 6-10 pints per acre.)

Almonds, Pistachios & Hazelnuts:	3-4 applications starting at bud swell and repeating at 3 to 4 week intervals
Apples:	3-4 applications. 1st application at bud swell, 2nd application 1-2 weeks after petal fall, and 3-4 applications starting 6-8 weeks before harvest.
Apricots, Peaches, Nectarines:	3 applications. 1st application at bud swell, 2nd application at petal fall, and 3rd application at first color.
Blackberries, Blueberries, Raspberries, and other Caneberries:	2 applications. One immediately post-bloom, and again 21-30 days later.
Brussel Sprouts:	2-4 applications starting at thinning or transplanting and as needed to pre-harvest.
Celery, Chicory:	2-4 applications starting before black heart symptoms appear.
Cherries, Plums:	1st application at bud swell, 2nd application at petal fall, 3rd application at first color, and 4th application 30-45 days pre-harvest.
Chinese Cabbage, Cabbage, Broccoli, Cauliflower:	2-4 applications per season starting at thinning or transplanting and as needed to pre-harvest.
Citrus & Avocados:	Apply 1st application pre-bloom. Apply subsequent applications at mid-crop and 3-4 weeks prior to harvest.
Cotton:	3 applications between 5-7 leaf stage and flowering.
Cucumbers, Melons, Peppers, Tomatoes:	2-3 applications from bloom through fruit sizing.
Head Lettuce, Leaf Lettuce:	1st application after thinning, continue biweekly through head formation.
Kiwi:	2-3 applications starting at bud swell through early fruit sizing.
Ornamentals, Conifers, Christmas Trees:	Apply diluted solution to thoroughly wet foliage. Apply at 2-3 week intervals and repeat as needed.
Pears:	3-4 applications. 1st application at bud swell. 2nd application 1-2 weeks after petal fall, and 3-4 applications starting 6-8 weeks before harvest.
Potatoes, onions, & other tuber crops:	2-3 applications starting at tuber initiation or earlier.
Strawberries:	Apply 1st application soon after transplanting, apply at 30 day intervals or as needed to supplement nutritional needs.
Table Grapes:	2-3 applications as required from bloom to ripening.
Turf:	6 - 10 pints/acre or 2.2-3.8 oz per 1000 sq. ft Apply monthly during growing season.
Wine Grapes:	2-3 applications starting post shatter and again at veraison.
Aerial applications:	Use Prudent Tri 9 in a minimum of 20 gallons of water. Suggested rates are for standard ground spray volumes of 40 to 150 gallons per acre. For higher volume sprays, rate should be adjusted upward.
